

TECHNICAL FEATURES

Gentle cleanser for smooth leathers. Remove daily soiling and waxes in excess.

It opens the pores of the leather allowing penetration of the nourishing agents present in the Saphir Médaille D'or range.

The addition of Montan wax prepares the pores of the leather to receive pastes, creams or the Médaille D'or maintenance lotions.

Its use is particularly recommended for those who regularly maintain their leather goods because it preserves the patinas and the base of mirror effect. This make a new glazing effect very easy to obtain.

Exclusive formula not classified as harmful, flammable or dangerous.

BEST USED ON

Smooth leather, oiled leather and oiled nubuck.

Also suitable for Cordovan leather.

Effective for cleaning sneakers and the slices of white rubber soles.

HOW TO USE IT

Recommendation:

Its highly innovative formulation has two phases that should be mixed imperatively. When applying the Cleanser, it is necessary to use the Médaille D'or Chamoisine, ensuring the cleanliness of the textile during each new application, so as not to soil twice the support with a dirty cloth.

ADVICE

It is very important to shake the bottle well before opening the product to obtain a good homogeneity. If your support is very dirty or has been maintained with other cleaning products than those of the Saphir range, we recommend using the Ref Cleaner Ref. 1584 to completely and very easily remove old layers of bad waxes, silicone or resin.

Make a test previously on a hidden part.
